

\_AT91S\_TC

```
graph BT; TCB[_AT91S_TCB] -.-> TC[_AT91S_TC];
```

The diagram illustrates a pointer relationship between two memory structures. At the bottom, a grey rectangular box contains the text `_AT91S_TCB`. A dashed purple line originates from the top of this box and points upwards to a white rectangular box at the top, which contains the text `_AT91S_TC`. Along this dashed line, three labels are positioned: `TCB_TC0`, `TCB_TC1`, and `TCB_TC2`, each preceded by a short vertical purple line segment. The labels are rendered in a light grey font.
